

PAX S80

Lower or eliminate processing fees with surcharges.

The U.S. is adopting EMV as the new standard in secure transactions. Be EMV ready with security and peace of mind.

Accept
EMV
payments.

Smartphones
welcome.

NFC (contactless) terminals make life easier and more convenient by completing transactions with a smartphone.

By adding surcharges to your customer purchases, you can lower and potentially eliminate your credit card transaction fees.

Fast &
Powerful

The powerful ARM11 processor assures high performance and faster, more reliable transactions.

Is your business at risk?

If you have one of the terminals below today, you are at risk of costly chargebacks that could be prevented by using an EMV enabled device.

EMV

With 394 million chip cards deployed in the United States, EMV is the new payment standard in the USA with an average of 23,000 EMV enabled terminals activated every week.

Contactless

By 2018, an estimated 1.9 billion phones worldwide will be NFC-enabled, bringing contactless payment technology into high demand.

Prevent Fraud

Merchants using EMV enabled devices experience a 26% drop in counterfeit fraud year over year.
